

IBRAHEEM ADEYEMO

SENIOR FRONT-END ENGINEER (Osun, Nigeria)

07035853137 aderemiibrahim11@gmail.com

ABOUT

I am a skilled front-end engineer with over five (5) years of experience. My expertise lies in JavaScript, React.js, TypeScript, Next.js, Node.js, Java, Express.js, PostgreSQL and Redux.js, Strong understanding of responsive design and development. I have experience creating user-centred software solutions that drive business transformation, developing intuitive and responsive user interfaces for web applications focusing on high-quality, client-centric solutions that enhance user experience. practices and experience with Agile and Scrum methodologies, optimising web applications for speed, scalability and cross-browser compatibility. I'm well experienced in using both frontend and backend build tools like Docker, AWS, GCP, Jenkins, Figma, Webpack, Babel, npm, yarn and Git, I've built fintech, e-commerce, marketing and school management applications and many more.

TECHNICAL SKILLS

- ❖ JavaScript, React.js, Redux.js, Next.js, JS(es6), TypeScript.
- ❖ Node.js, Express.js, Java
- ❖ HTML5, CSS3, Chakra ui, Tailwind, Material UI.
- ❖ Webpack, Babel
- ❖ Docker, Nginx, Git.

EXPERIENCE

[Interswitch](#)

Front-end Architect (August 2023 - Till Date)

- ❖ Orchestrated the conceptualisation, development and deployment of the Fraud Detection and Prevention Portal. It enables customers to manage payments securely.
- ❖ Led the development of the front-end part, gave technique support to junior colleagues, and managed the communication among the stakeholders.
- ❖ Built the Payment Management system using micro frontend architecture, built each micro front-end with React, and managed the global state of each application with redux. Also used Docker and Webpack.

[Interswitch](#)

Software Engineer (December 2021 - Till Date)

- ❖ Built **transaction monitoring** application called **payment-as-a-service** (PaaS). It enabled financial institutions to get real-time transaction data.
- ❖ Built Eco-Oauth application; this improved client application security by creating an authentication and access management portal for a financial institution.
- ❖ Worked closely with UX/UI designers, back-end developers, and consulting teams to translate business requirements (Audit module features) into functional, visually appealing interfaces.
- ❖ Led a team to optimise web applications for speed, scalability, and cross-browser compatibility, ensuring best practices and maintaining high-quality code.
- ❖ Technologies used are React, Nextjs(Framework), Typescript, Redux (state management libraries), Java, OAuth, Springboot, Nginx, Docker, Figma and Jenkins.

[Supermart Express](#)

Frontend Developer (March 2020 - December 2021).

- ❖ Write clean, maintainable code, and conduct code reviews to ensure adherence to best practices and coding standards.
- ❖ Built an Inventory Management System, and improved on the **product listing model** by creating a **Product Variants Management System**. This feature **automated and simplified** inventory records taking, for the admins.
- ❖ Built a customizable **Webview** platform for franchises, and collaborated with mobile developers to **Build** a mobile application targeted to increase the number of daily orders.
- ❖ Built global state management in react native with redux and redux-thunk for asynchronous requests. I implemented routing with react-navigation and created both drawer and tab navigation. Also implemented Jest for testing.
- ❖ **Debugged** and **fixed** bugs, reviewed codes and **improved** the user experience and the reliability of our platform.
- ❖ Technologies used are Angular, React, Docker, Typescript, Gitlab, and AWS.

[Sadjawebsolutions](#)

Fullstack Developer (September 2019 - March 2020)

- ❖ Wrote modern, performant, maintainable code for a diverse array of client and internal projects.
- ❖ Built an admin dashboard, integrated with the API and populated with dynamic data.
- ❖ Built vendors/admin-managed delivery applications. Functionalities include CRUD actions, creating a vendor's account, approval of a new vendor, banning a vendor, and managing stores and products.
- ❖ Designed mockups and converts, converted UI/UX designs into responsive web pages
- ❖ The technologies used are Nodejs, Express, Typescript, React.js, Redux, Angular, Docker, and Github.

Andela's StackUp Program

(May 2018 - September 2019).

- ❖ Worked with react tools like Redux.js, Jest, Webpack, and Enzyme.js, Restful API.
- ❖ Configured automated testing platforms and unit tests using Jest/Jasmine, Jenkins.
- ❖ Built in-house travelling management application. This enables the company to track all the staff travelling records.
- ❖ Built backend application using node.js, express.js, socket.io Restful API and Postgres database.
- ❖ Practised agile methodology, project management, daily stand-up, retrospect planning, and communication management among the stakeholders.
- ❖ Skills used are - React.js, Redux.js, Node.js, PostgreSQL, Express.js., Docker, Git/GitHub, and Pivotal Tracker.

EDUCATIONAL BACKGROUND

- ❖ Ladoke Akintola University Of Technology (LAUTECH) (2010-2015).
Biochemistry (BTech).
