

IBRAHEEM ADEYEMO

Frontend Engineer

Osun, Nigeria | +234 703 585 3137 | aderemiibrahim11@gmail.com | linkedin.com/in/ibraheem-adeyemo | github.com/ibraheem-adeyemo | ibrahimadeyemo.com

SUMMARY

Dynamic Frontend Engineer with 6+ years of robust experience in developing large-scale applications using React and TypeScript. Expertise in architecting user-friendly interfaces and optimizing performance, resulting in a 55% reduction in manual processes and a 30% decrease in page load times. Demonstrated success in leading teams, enhancing code quality, and delivering projects on time. Ready to leverage skills in creating innovative solutions that align with the needs of forward-thinking companies.

WORK EXPERIENCE

Lead Full-Stack Engineer (Contract)

02/2026 – Present

Paytelstack · Ibadan, Nigeria

- Spearheaded the end-to-end architecture, development, and deployment of a production-grade fintech SaaS platform, overseeing the complete technical stack from backend systems to production infrastructure.
- Engineered a scalable Node.js + TypeScript backend with RESTful APIs, JWT authentication, RBAC, rate limiting, and secure payment processing workflows for handling real-money transactions.
- Formulated a normalized PostgreSQL schema utilizing Prisma ORM with ACID-compliant operations, relational modeling, and a versioned migration strategy.
- Integrated live payment gateways (Stripe, Paystack, Flutterwave) with webhook validation, signature verification, idempotent transaction handling, and automated reconciliation logic.
- Instituted containerized deployments via Docker (multi-stage builds, non-root security, health checks) alongside a fully automated CI/CD pipeline through GitHub Actions for zero-downtime releases.
- Deployed production infrastructure leveraging NGINX reverse proxy, SSL termination, managed PostgreSQL, environment-based configuration management, comprehensive testing (unit & integration), structured logging, and rollback mechanisms.

Senior Frontend Engineer

12/2021 – 01/2026

Interswitch · Lagos, Nigeria

- Architected a multi-role dashboard for Admin, Merchant, and Bank Agent roles with comprehensive RBAC, serving over 1,800 users and processing more than 600,000 monthly transactions.
- Developed Request to Pay workflows, a dispute management system, real-time analytics dashboards, user administration, and comprehensive audit logging for regulatory compliance.
- Designed a scalable React component architecture with reusable UI patterns, ensuring consistency across role-specific interfaces while optimizing performance and maintainability.
- Championed the development of a fully automated Export Letter of Credit (LC) module, cutting manual processing time by 55% and enhancing compliance accuracy for international trade operations.
- Executed SWIFT message generation for LC and correspondence events, facilitating seamless and secure cross-border banking communications.
- Constructed a charges and postings engine adept at handling complex multi-currency calculations with robust error handling and validations.
- Developed correspondence event workflows featuring multi-level approvals, real-time stakeholder notifications, and clear audit trails.
- Devised and implemented a scalable Fraud Detection & Prevention Portal architecture, safeguarding millions of daily transactions with real-time monitoring and intervention tools.
- Engineered a Payment Management System using microfrontend architecture, allowing independent module deployment and increasing release speed by 32%.
- Optimized API integrations and frontend performance, reducing page load times by 30% and significantly enhancing user experience.
- Mentored a team of junior developers through code reviews and the introduction of engineering best practices, boosting team productivity and code quality.

Frontend Developer

03/2020 – 12/2021

Supermart Express · Nigeria

- Developed a Product Variants Management System, resulting in a 45% reduction in manual inventory errors.

- Enhanced global state management in React Native applications utilizing Redux and Redux-Thunk for complex e-commerce workflows.
- Introduced automated testing with Jest, increasing release confidence by 25% and decreasing production bugs.

Fullstack Developer

Sadjawebsolutions · Nigeria

09/2019 – 03/2020

- Constructed vendor and admin delivery platforms featuring real-time updates using Firebase and WebSockets.
- Designed responsive UIs from Figma mockups utilizing React and Angular, ensuring pixel-perfect implementation.

Full-Stack Developer

Andela · Nigeria

08/2018 – 09/2019

- Developed full-stack applications leveraging React.js, Redux, Node.js, Express.js, and PostgreSQL while adhering to industry best practices.
- Implemented comprehensive unit and integration testing with Jest to ensure reliability and maintainability.
- Acquired hands-on experience with CI/CD pipelines, agile workflows, and collaborative code reviews in a fast-paced environment.

EDUCATION

Bachelor of Technology (B.Tech), Biochemistry

Ladoke Akintola University of Technology (LAUTECH) · Nigeria

2015 – 2020

SKILLS

React.js	Next.js	TypeScript	Redux Toolkit
JavaScript (ES6+)	Chakra UI	Tailwind CSS	Material UI
Node.js	Express.js	PostgreSQL	Prisma ORM
Firebase	Supabase	RESTful APIs	Docker
Nginx	AWS	Git	Jenkins
GitHub Actions	CI/CD
