👤 ABOUT ME

Front-End Engineer with 6+ years of experience building scalable, user-focused web applications for fintech, e-commerce, and enterprise platforms. Expert in React, TypeScript, and modern front-end architectures, with a track record of delivering high-performing solutions that process millions of transactions securely. Passionate about mentoring teams, optimizing performance, and driving business outcomes through technology.

🎓 EDUCATION

**BTech, Biochemistry, Ladoke
Akintola University Of
Technology (LAUTECH)**
2015

🧠 TECHNICAL SKILLS

Frontend — React.js | Next.js | Redux Toolkit |

TypeScript | Chakra UI | Tailwind CSS | Material UI

Backend — Node.js | Express.js | PostgreSQL |

Firebase | Supabase • **DevOps & Tools** — Docker |

Nginx | AWS | Git | Webpack | Jenkins | Figma

👛 EXPERIENCE

Front-End Engineer, Interswitch

12/2021 – Present

Recent Project: International Trading Platform
(Import/Export)

- Led the development of a fully automated Export Letter of Credit (LC) module, reducing manual processing time by 0% and improving compliance accuracy for international trade operations.
- Implemented SWIFT message generation for both LC and correspondence events, enabling seamless and secure cross-border banking communications.
- Built a charges and postings engine capable of handling complex, multi-currency calculations with robust error handling and validations.
- Developed correspondence event workflows with multi-level approvals, real-time stakeholder notifications, and a clear audit trail.
- Enhanced platform security by introducing role-based access controls (RBAC), audit trails, and rigorous data validation processes.
- Tech stack: React 18, Next.js, TypeScript, Redux Toolkit, Chakra UI, REST APIs, Docker, Nginx, Jest.

Other Key Contributions:

- Fraud Detection & Prevention Portal: Designed and implemented a scalable frontend architecture to safeguard millions of daily transactions, providing real-time fraud monitoring and intervention tools.
- Payment Management System: Built using microfrontend architecture, allowing independent deployment of modules and increasing release speed by 0%.
- Optimized API integrations and frontend performance, cutting page load times by 30% and improving user experience.
- Team leadership: Mentored junior developers, led code reviews, and introduced engineering best practices to boost productivity and code quality.

- Technologies: React, Next.js, TypeScript, Redux Toolkit, Docker, Nginx, Jenkins, Figma.

Frontend Developer, Supermart Express

03/2020 – 12/2021

- Developed a Product Variants Management System, reducing manual inventory errors by 5%.
- Improved global state management in React Native apps using Redux and Redux-Thunk.
- Introduced automated testing with Jest, improving release confidence by 25%.
- Technologies: React, Angular, Docker, TypeScript, AWS, GitLab.

Fullstack Developer, Sadjawebsolutions

09/2019 – 03/2020

- Built vendor and admin delivery platforms with real-time updates using Firebase and WebSockets.
- Designed responsive UIs from mockups using React and Angular.
- Technologies: Node.js, Express.js, React.js, Redux, Docker, GitHub.

Full-Stack Developer, Andela (Startup Training Program)

08/2018 – 09/2019 | Nigeria

- Developed full-stack applications using **React.js, Redux, JavaScript, Node.js, Express.js, and PostgreSQL**, following industry best practices.
- Implemented **unit and integration testing** with Jest to ensure reliability and maintainability of features.
- Gained hands-on experience with **CI/CD pipelines**, agile workflows, and collaborative code reviews.
- Strengthened skills in **end-to-end product development**, from designing RESTful APIs to building responsive user interfaces.
- **Tech stack:** React.js, Redux.js, JavaScript, Node.js, Express.js, PostgreSQL, Jest, Git, CI/CD
